10

So would you have had any reason to send work documents from your Transport for NSW email address to your personal email addresses?---That was, that was more to look at documents, because I was new to the project, I was just trying to learn more about, about the work and study some documents, so I can be prepared for meetings, things like that. And, and the information just helped me. So if it was on the weekend and I was looking

20   through things on, you know, the library computer, then I could have a look, if I thought about something and, and, and look at that.

And on the library computer?---Yeah.

As in the computer at your local library in your area?---Yeah, yeah.

Was there a reason you didn't look at them on your Transport-issued laptop?---There was, because they went to my personal. That's the reason. So on my, on my if I was looking at my private emails, which I, probably is

30   sending information to myself, then I would look at them in, in my, on my computer or on, on the council library computer, you know, wherever I was, you know?

So my question to you is why would you look at them on your personal computer or at a public library as opposed to on a Transport-issued laptop? ---Because at that time, if I'm correct, if I, if I remember, I didn't want to take my work home. So this was kind of, like, let's call it extracurricular activity for myself to learn more about the project as my, my desire wanted to, outside of the core hours that I was working. That's, that's the reason

40   why - - -
