GEOVERT

DOWNER BANKSIA STATION – MICRO PILES FOR LIFT PITS

Good Afternoon,

Geovert have pleasure in submitting the below for your consideration. Due to the limited time scale we have not submitted through a portal as discussed. Should this offer be of interest and Downer wish to proceed to an order or shortlisted contractor, we would be happy to return the documents required to comply.

We have reviewed the tender documents however its clear that the pile design has been changed to a micro pile option. The notes on the drawings all still refer to a cast insitu or CFA type pile and will require amending.

We have priced to test 1 working anchor / micropile as per the tender addendum however Downer should be made aware that due to no preliminary testing there is a risk of failure after all contract piles have been installed.

We have attached the 2 rig specifications and the rigs would be relatively light weight and manoeuvrable and should offer savings upon preparation works and piling matts accordingly. The first should be able to operate on Lift site 1 & 3 and the third is a small compact drill rig for Lift 3.

Geovert have allowed to install the piles only as a specialist drilling contractor and assumed pile cropping and pile caps etc shall be installed by others.

We have made an allowance for Traffic management for offloading however Downer shall afford room on site for plant and equipment to be offloaded quickly. We have allowed half a day to offload and half a day to load upon completion of the works.

As requested we have allowed for a small excavator and skip bin attendance to dispose of arisings from site.

3	We have not allowed for setting out or survey of the pile positions				
4	We have allowed for acceptance test at one per base, no other testing has been allowed for.				
5	We have allowed for 3m lengths to be installed with a Hutte 504 drill rig.

No spoil disposal, survey, site preparation and drill depths are assumed to be as per pile design, i.e circa 4m below ground level. That's about 100m of extra hollow bar

Our big rig is 5t. Our small rig is 2t. There big rig is 15t, there small rig is 4.5t. That's why they are 2 weeks on site. There is a grey statement in the offer that says you are to provide access to all locations for them. Im not sure there 4.5t rig will get to lift 2
