The WISP is a federally funded program we just build what they ask. He needs to take it up with Fletcher. Planning would also be involved in this.

Tell him you can arrange a meeting with RMS/Transport for NSW in the next sitting period.

Kind Regards,

Les Wells

Subject: SmartWest.Sydney Request

Hi Daryl

After speaking with RMS and advisers in our office, please see advice below:

The location of the intersection within the Western Sydney Airport was specified by the federal Department of Infrastructure and Regional Development. The location of the intersection was then reviewed by Roads and Maritime to assess its suitability for the project. The proposed design provides scope for modification to a four-way intersection format, to support future development west of The Northern Road and Western Sydney Airport.

Roads and Maritime and Transport for NSW's Freight, Strategy and Planning Division reviewed the submission provided by SmartWest.Sydney in detail and the project team have carried out further consultation with the organisation since exhibition of the EIS. Following this review and consultation Roads and Maritime and Transport for NSW have found no compelling reason to modify the location proposed for the intersection.

Thanks

Jock Sowter
