Dear Mr Wallace

**Riverina Conservatorium - Wagga Wagga Recital Hall**

Thank you for taking the time and effort to submit the details of your project to the Regional Communities Development Fund.

The assessment panel has reviewed your business case and deemed there was insufficient information to support a proper assessment. It was noted that a data sheet for the project was not provided to support the business case. More work needs to be done to progress the Recital Hall project to be ready for a funding contract.

The Recital Hall remains an important project for the Riverina region and the commitment of \$20 million from the NSW Government to this project remains steadfast.

In order to progress funding arrangements for this project the Conservatorium will need to provide:

- More detailed design and project costings
- A complete and proper business case
- A data sheet to support the financial case for the project
- Greater details on the operating model for the overall project

I understand these applications often require significant resources to develop and we appreciate the amount of work in putting it forward. I encourage you to work with your allocated Business Development Manager to develop the above documents in order to progress the funding for this project.

Your allocated NSW Government Business Development Manager (BDM) is:

Jane Barnes
