Hello

We can tighten this up later but here is an email address.

i can personalise it so it comes up as my name or your name or just the business name

The address id

gatewayasiapacific@gmail.com

If you want to access it and use it just go to google, across the black bar about 4 from the right you will see gmail..click that...

where it says sign in type gatewayasiapacific

and for the password (we can change to suit) but the password is your wifes name followed by yours...no spaces..

Cheers

Phil
