G'day Daryl,

Thanks for your email. I have attached three documents for your perusal. The first is a presentation which gives some information about our company, some background on investing in Australian grain properties, and also some actual examples. The second document is a presentation I have put together for Chinese investors. Although it mainly concentrates on the buying of rural properties to lease, these properties can also be purchased and operated by the new owners. The third document is an IM for the Tobain property at Leeton.

We would be more than happy to chase up other rice farms if needed.

If you require any further information regarding farms in Southern NSW, please do not hesitate to contact me.

On another matter, Maggie has accepted us for the visa intern program and it looks like we are going to get a placement sometime in the next couple of months. I am very excited about this development as it will potentially give us a great conduit into China attracting Chinese agri investment. Thank you so much for arranging this for us.

Regards Angus
