

The Hon Graham Annesley MP  
Minister for Sport and Recreation  
Level 33, Governor Macquarie Tower  
1 Farrer Place  
SYDNEY 2000

Dear Minister,

Please find enclosed correspondence received from Mr Chris Gibson, Executive Officer, Australian Clay Target Association for mutually convenient appointments to be arranged with you, Minister Souris, myself and Mr Gibson concerning the development of the ISSF Infrastructure at the National Grounds Wagga Wagga.

The aim is to build an International Standard Clay Target facility capable of holding the events conducted at the Olympic and Commonwealth Games. This would also allow Australia Cups, World Championships and selection trials to be conducted on the National Grounds.

The proposed facilities will increase opportunities for junior development for International Olympic Disciplines due to the location, ease of access and proximity to the main population areas.

ISSF World Cup events are televised on international TV which provides an opportunity to showcase the region and its products.

ACTA has recently purchased the land and safety template areas from the Council of the City of Wagga Wagga to ensure long term security and viability as well as to allow the opportunity to develop this facility.

I look forward to advice of a mutually convenient time to discuss these issues.

Yours sincerely

**DARYL MAGUIRE MP**
